PROFILE

Highly motivated and ambitious software engineer with startup experience. Always keen to learn about new technologies and concepts which can support my day to day job and improve my knowledge. Looking for new opportunities and challenges to improve my skills and make a meaningful contribution to the business.

EMPLOYMENT HISTORY

Software Developer at The Just Brand, Petersfield
February 2023 — July 2025

- Was responsible for developing Bespoke WordPress & Shopify websites for clients that come from various sectors

- Helped clients with pre-made design themes and tailored said design themes to suit their requirements, aesthetic, and vision of their new websites

- Helped with the multiple design stages of websites by providing valuable feedback and inspiration that help elevate the quality of them

- Was responsible for maintaining and managing multiple website contents for multiple clients all at once

- Got to be more familiar with scoping out multiple sized website projects

- Helped with fixing security vulnerabilities for website that were found after running them through penetration testing

- Helped with extending the functionalities of the clients' websites through enhancements such as applications or plugins

- Was responsible for setting up Marketing Analytics tools for websites ranging from Google Analytics to Hotjar

- Was responsible for providing SEO Optimisation & Site Audit fixes to help websites rank higher in their authority and domain score

- Was responsible for multiple clients getting their overall website health into the top 10% of ranked sites that compete with the likes of Amazon and E-Bay

- Was responsible for scoping out a large scale website project through Jira for our client, covering all aspects from scratch with a long timeline, ranging from development to security, hosting platform and installation, etc.

- Was responsible for developing multiple websites that were based on Figma Designs, Wireframes, and provided by Designers through collaboration

- Helped with the development of the company's website

- Helped with the development process of a new website for a high-profile client using Vue-Storefront

- Helped with migrating websites from Magento to Shopify

Developer at Phi Capital Investments
November 2021 — October 2022

- Designed the landing page for their custom in-house portal called Iris, which increased marketability and exposure for said portal
- Fully managed the company's website, refactored and keeping it updated on a weekly basis with the latest content due to the fast pace of the business
- Built a Content Management System by developing a custom WordPress theme for the company in a full-stack manner utilising:
  - HTML
  - CSS
  - JavaScript
  - Bootstrap
  - PHP
- Worked with micro-services by delivering information through the front-end guided by the introspection and Schema utilising:
  - Vue.js
  - Vite
  - GraphQL
  - HTML
  - CSS
  - JavaScript
- Worked with CICD DevOps with task management for both the website and Iris
- Worked with Figma to develop wireframes as guidelines for the next web pages for a clear vision as well as receiving critical feedback for on-demand changes
- Developed the front-end of the next version of the Iris utilising:
  - Vue.js
  - Vite
  - HTML
  - CSS
  - JavaScript
  - BootStrap
- Developed a micro website to advertise Iris from its features & capabilities to its statistics utilising:
  - Vue.js
  - Vite
  - HTML
  - CSS
  - JavaScript
- Have done System Operations on setting up servers by using the terminal
- Helped with Advertisement & Marketing by making and extensively editing a video advertising the company's specialities for the Housing 151 Conference 2022
- Was responsible for IT Administrative duties by setting up new employees with their own Microsoft accounts & services, and setting up their hardware to meet company standards
- Serving as the first point of contact to any front-end related issues

QA Assisstant at VidiCrew
July 2021 — November 2021

- Was responsible for building robust test automation scripts for both mobile and website testing purposes and introduced an agile change control procedure which is now being applied before every single new release.
- Got familiarity with cloud services and AWS and some of its core services used in the IoT space such as Device Farm.
- Worked in a highly energetic and agile startup environment.
- Learned about tools such as Selenium, Docker, and Appium and continue to learn more about the AWS services.

Developer at Universal Design Tech
November 2020 — February 2021

- Worked on building a survey application for auditing purposes in the architecture business to help assess the building's accessibility for the disabled by its architecture.
- Used low code IDE that specializes for business applications with native HTML and CSS components that works well as a web application for both mobile and desktop, and can be exported as a desktop program and mobile application.
- Got to be more familiar and learned more about the Agile Methodology with weekly team meetings and sprints.

Web Developer Intern at STS (Specialised Technical Services)
October 2019 — December 2019

- Closely collaborated with a Technical Manager with tasks being provided to me while learning a lot more and utilising:
  - Bootstrap
  - ASP.NET
  - HTML
  - CSS
  - JavaScript.
- Developed a Training Leave Request web-page by using what I learned in the internship as well as connecting it to SQLite for data storage and using SQL Server to create the database diagram for the web-page.

EDUCATION

BSc in Software Engineering, Philadelphia University
October 2016 — June 2020

- Graduated with Honours
- Dean's Honour List
  - 2017
  - 2018
  - 2020

Coach Finder
March 2025 — April 2025

A Single-Page Application (SPA) website made for anyone to register as a development/career coach with their own description and hourly rate, and to seek out other coaches for help, requiring an account stored in firebase to view certain restricted pages.

Made using Vue.js as the front end and Firebase as the backend.

The website is made covering all the Vue.js core concepts such as:

- Routing
- Authentication
- State Management with Vuex
- Transitions
- Component Communication
- Slots
- Using APIs
- Auto Login/Logout

And more..
